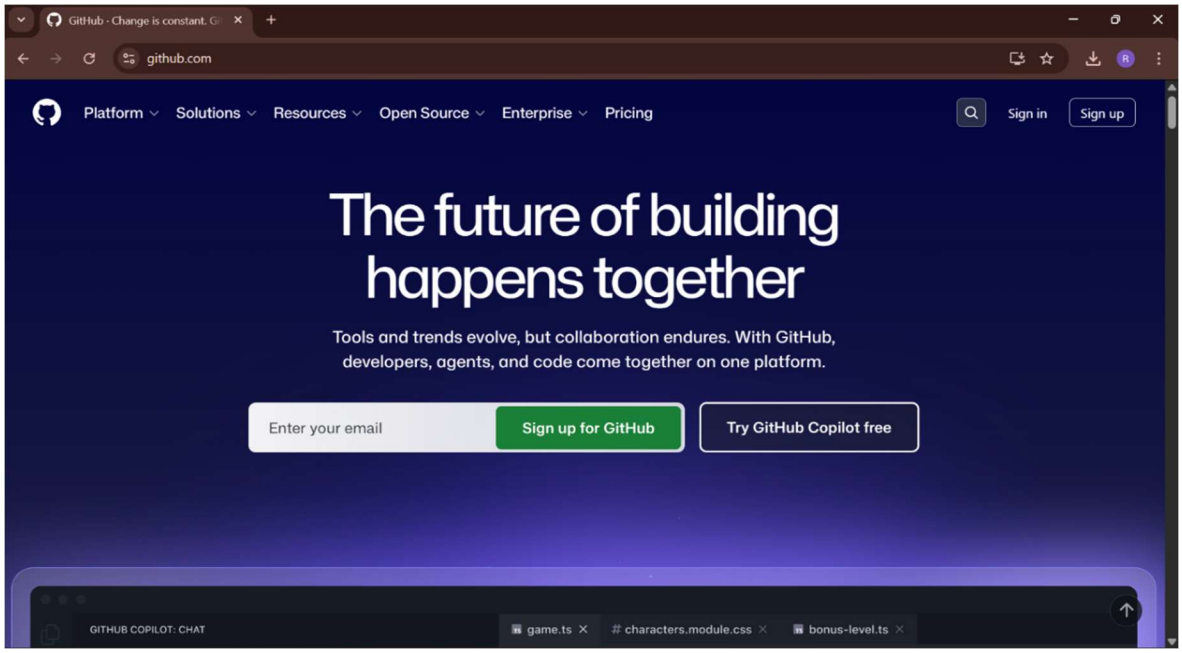
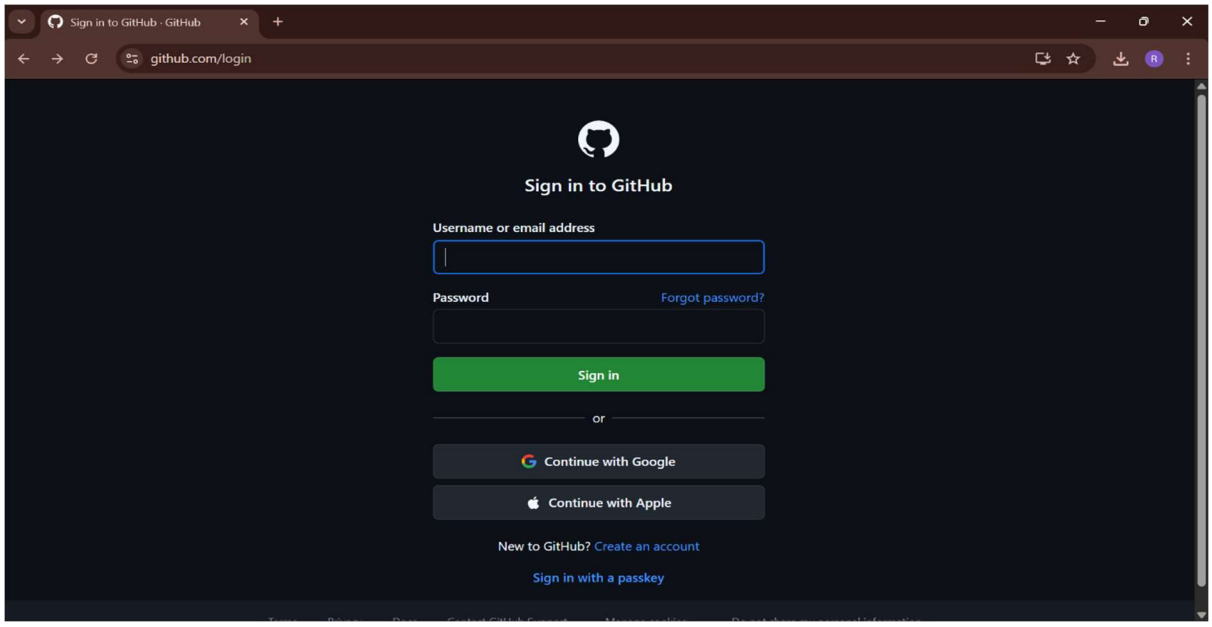
Week -7

7.A) Aim: create a GitHub account and create a repository in it and push all the week 6 code files in it. **Procedure :**

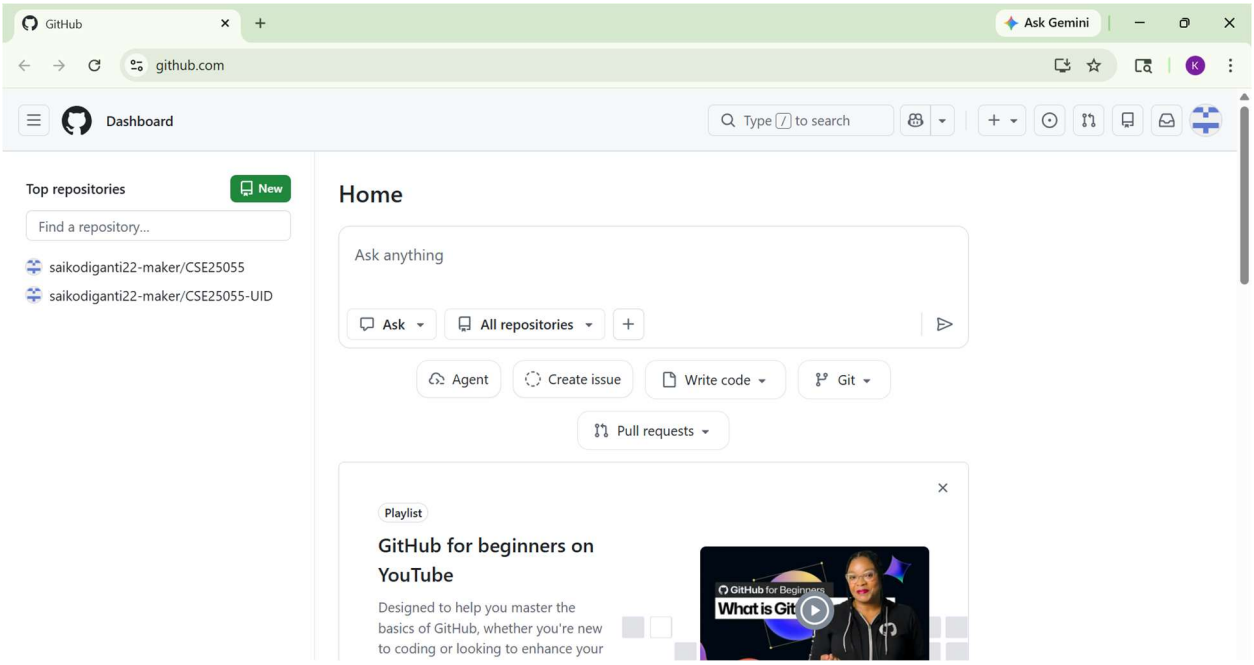
Step 1: browse for GitHub and enter it.



Step 2:login to GitHub account.

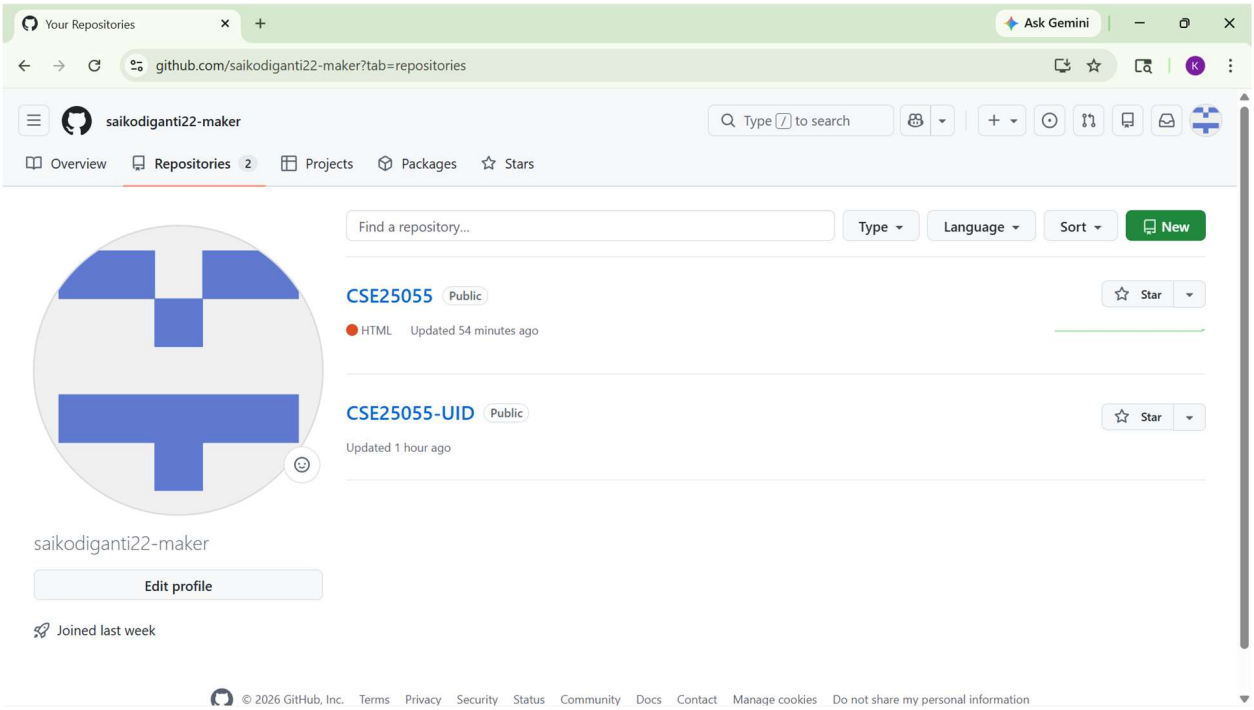


Step 3:create a repository after login by clicking new.

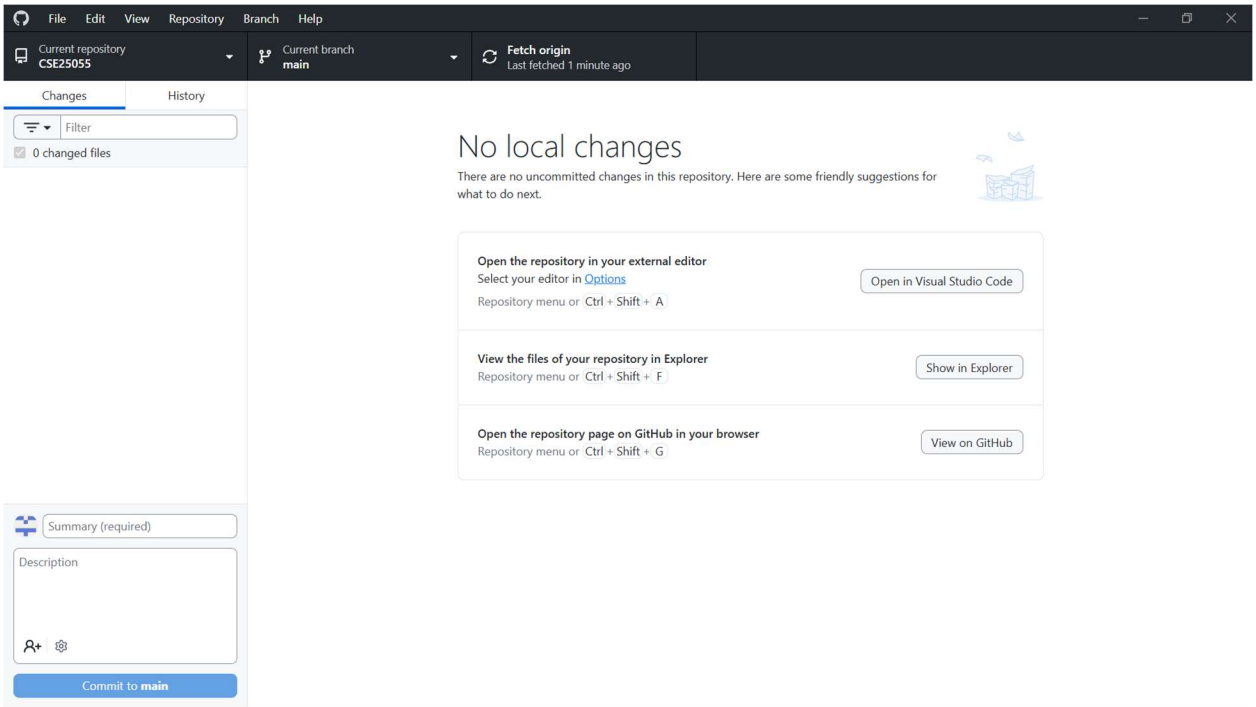


Step 4:specify the repository specifications.

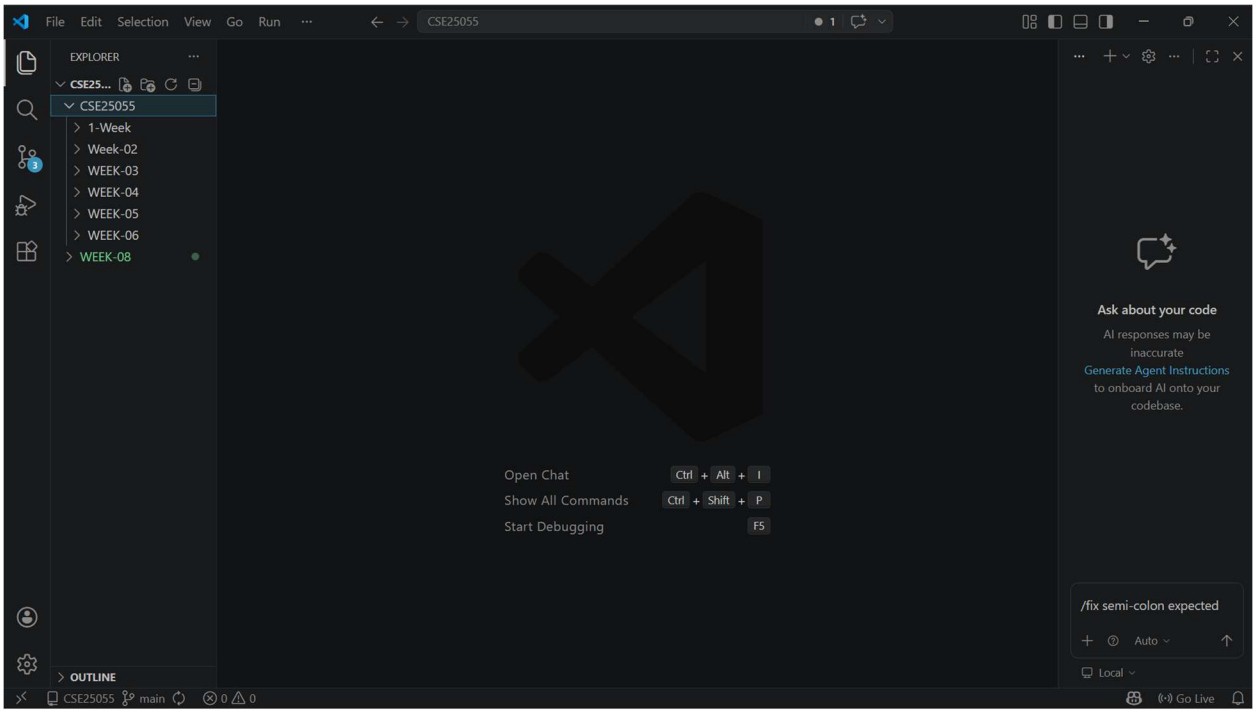
Step 5:download GitHub desktop and Lauch it .



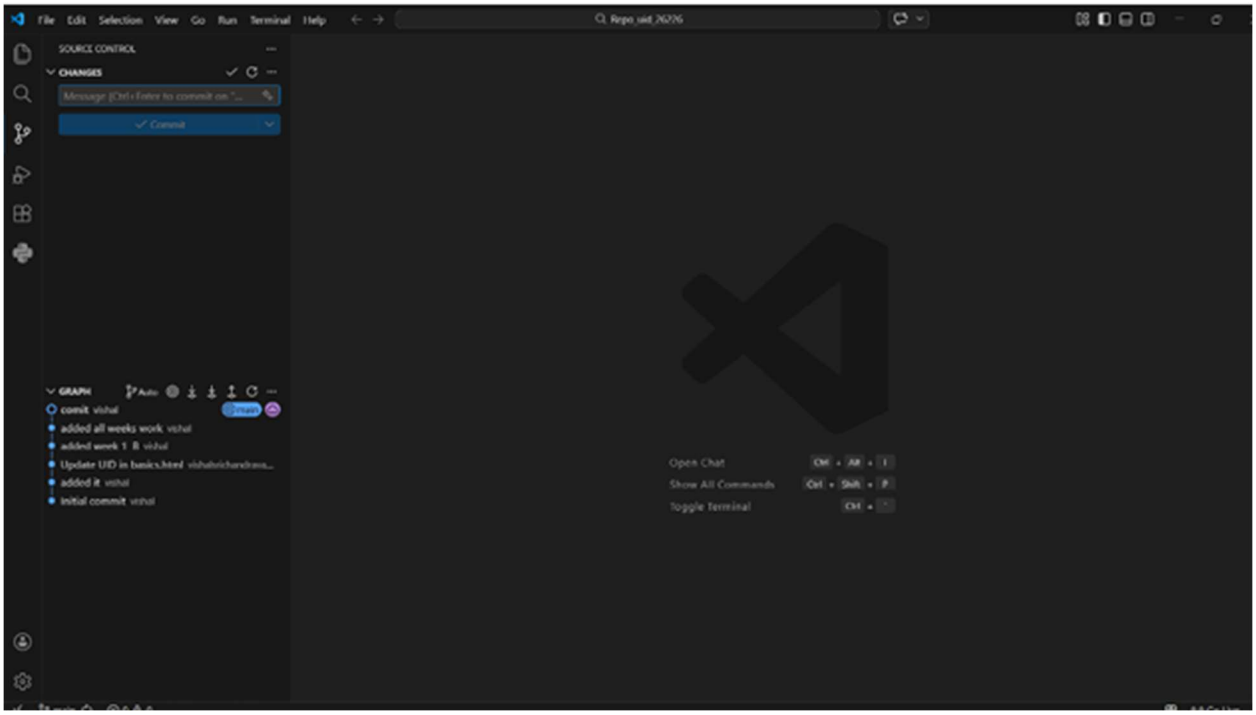
Step 6:add the repository to it .



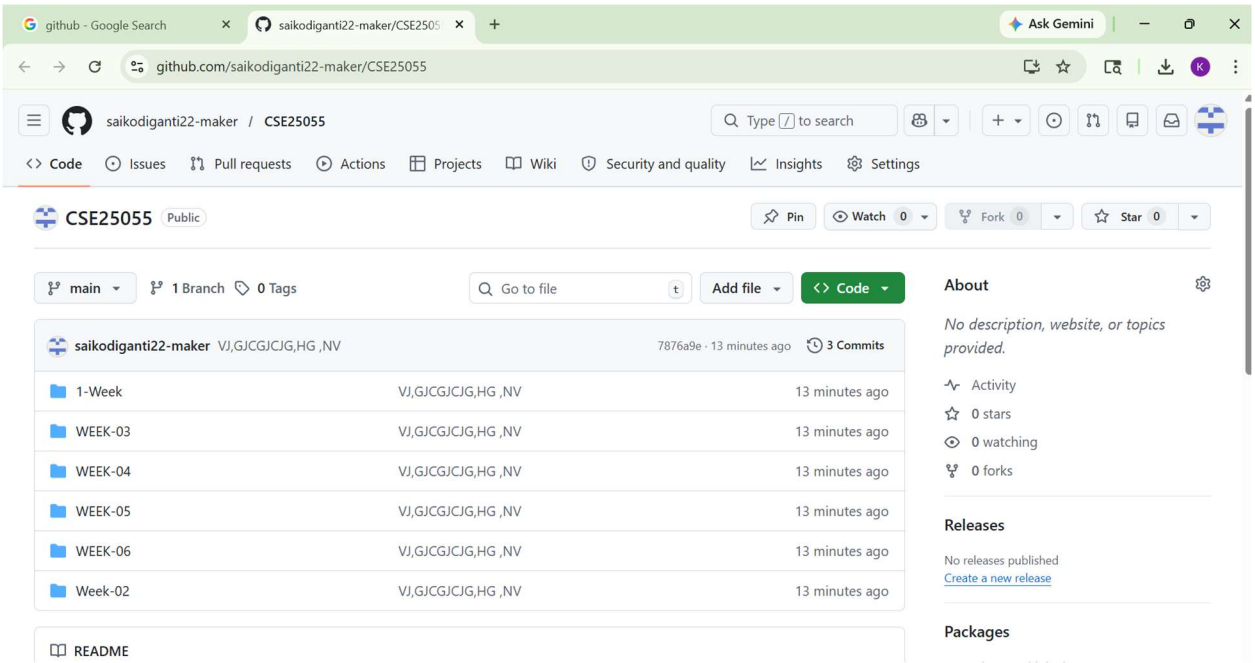
Step 7:add the vs code file to the GitHub desktop.



Step 8:add commit to it and the files to repository and sync the changes . it automatically pushes the files .



Step 9:now go to browser and check it . it will show all the new added files in the repository .



My repository link for the uid all week's work : https://github.com/saikodiganti22-maker/CSE25055
